

MSI - Your Superior Source for ISO/AS Consulting, Training and Software

Power Your Business Forward. Management Systems International (MSI) comprehensively provides consulting, training and software on international standards to power your business forward through certification and continued compliance.

Complete Consulting

We provide industry-leading consulting services on international standards while implementing or managing your quality or environmental management system. In true partnership with you, our expert consultants leverage years of experience with ISO and AS standards, advanced tools and highly effective procedures to offer:

- » Turnkey implementation using our SurePath® methodology
- » Gap Analysis
- » Environmental issue identification
- » Developing, reviewing and transitioning procedures to meet international standards, as appropriate for your organization
- » Internal audits

» Ongoing maintenance using our SureResults™ methodology

Learn more about MSI's SureResults proactive maintenance program in our SureResults data sheet

» Numerous other capabilities

As a result, you valuably:

- » Streamline systems, processes and documentation
- » Eliminate operational gaps, redundancy and waste
- » Improve operational efficiency, performance and access tools to further your competitive edge
- » Deliver consistently top-quality and environmentally conscious products and services
- » Improve customer confidence and satisfaction

INNOVATIVE TRAINING

Our wide range of training courses offers easy-to-understand instruction on your quality or environmental management system. In our dedicated training facility or on your company site – whichever you prefer, we provide training in the context of your specific industry, business and activities.

As a result, you beneficially obtain custom education on:

- » ISO 9001, ISO 14001 or AS 9100 standard and certification
- » Quality or environmental management system planning, implementation and maintenance
- » Internal and lead auditing

SOFTWARE SOLUTIONS

Using proven web-based software such as PROQUIS compliance management solutions, we can substantially simplify your workload, workflow and improve your business processes.

As a result, you valuably:

- » Streamline document, process and procedure controls easily with absolute revision tracking and distribution as well as integrate controls with other systems such as auditing, management review and corrective and preventive actions
- » Obtain full visibility of internal audit planning, noncompliant issues, risk, legal and regulatory compliance, supply chain processes, and health and safety issues and actions

- » Assess and manage compliance, quality assurance, risk and continuous improvement efficiently
- » Manage and analyze nonconformance reports (NCR), corrective action reports (CAR) and preventative action reports (PAR) with ease
- » Locate, sort and extract real-time data anytime, from anywhere
- » Automate process flowcharting and analysis, using allCLEAR software
